space.

Forbidden Planet

Synopsis

Life on a planet in the year 2200 A.D. This is the adventure into outer space of a rescue mission sent to bring Dr. Morbius back to earth from the planet Altair-4. For twenty years the professor and his daughter have lived alone on the planet learning the startling secrets of the now extinct inhabitants. He does not wish to share this knowledge with earth. As the rescue crew tries to persuade Morbius and his daughter to return, a crew member is mysteriously killed. Even though Morbius denies it, Adams believes he is behind the killing and the subsequent attacks on the rest of the party. As Adams prepares to return with Altaria and as Morbius tries to stop them, the unseen terror strikes, threatening to destroy all. The climax is a spine-tingling surprise.
